

BROADVIEW HEIGHTS MASTER PLAN

IMPLEMENTATION

County Planning

SECTION 1

IMPLEMENTATION

WHAT'S INSIDE

Moving from vision to implementation requires commitments of time and resources. The Implementation section ties individual actions to partners, timeframes, and potential funding sources to ensure that all stakeholders are aware of how actions can be accomplished.

This section includes tables that correspond to each goal, strategy, and action from the Recommendations document. For each action, detailed information is listed including a time frame identifying how long it could take to accomplish the strategy, parties that could assist in its implementation, and potential levels of funding required. It also provides space to add notes regarding the status of a project and the date an action is completed.

The implementation tables are meant to serve as a guide; however, priorities, funding streams, and partners can and will change over time. New resources should be evaluated against action items as they arise.

HOW DO I USE IT?

The Implementation section informs not only City Administration and elected officials of responsible parties for undertaking actions, but it also discusses potential partnerships with private property owners, other municipalities, and other units of government to demonstrate that accomplishing the plan will take efforts from many groups.

HELP! — WHERE DO WE START?

The first step in implementing plans is often the most overwhelming. Where do we start? Who should do what? How do we stop the plan from sitting on a shelf? County Planning knows from experience that every community's path to implementation is different.

The column to the right includes recommended best practices that will guide Broadview Heights on its path to Master Plan Implementation.

Where to start:

- Use the implementation table to **pick the top actions** to be undertaken each year and **assign personnel responsible for those actions**
- Establish a **Plan Implementation Committee** that meets quarterly to review the actions that are underway
- Publish an **Annual Results Report** detailing what has been accomplished

Still lost? Contact County Planning and we can help you get started.

ACTIONS & COLLABORATION

It is intended that this Master Plan will be used by the City of Broadview Heights—as well as property owners, business owners, and developers—when deciding where, when, and how to make investments for the betterment of the City. A viable implementation program—one that sets forth specific action items—is a valuable tool to ensure that recommendations are acted upon.

TYPES OF ACTIONS

Actions included in this document can be categorized in three ways:

Proactive Actions include recommendations for revising, expanding, promoting, or developing new programs or services. These are actions that would not otherwise occur unless undertaken by residents, supportive groups, or the City.

In addition to proactive actions, the plan recommends certain **Responsive Actions**. These actions are to be undertaken when certain conditions are met. For instance, ensuring new homes are well-designed would be triggered when a development proposal is submitted to the City.

Finally, the Master Plan recommends certain **Ongoing Actions**. These actions are meant to underscore positive steps already happening and which are important to continue or to improve.

COLLABORATION

It is important to recognize that there are factors that impact the City that are beyond its control, including economic instability or regulatory changes. In such cases, it is critical to forge and maintain supportive partnerships with those who can provide assistance. In addition, because cities across the County and State are facing declining resources, it is becoming more important than ever to engage firms, institutions, and citizens to collaborate in the work of local government.

The Master Plan identifies opportunities for engaging with other entities in developing mutually beneficial programs. With this in mind, the City can serve as a champion and supporter to help spur collaboration.

READING THE TABLES

The implementation tables on the following pages link directly to the actions in the Recommendations document. The tables include details such as Projected Timeline, Responsible Parties / Potential Partners, Estimated Cost, and Status. Potential Partners are identified through symbols as shown in the legend on the following page.

While Potential Partners, Estimated Timelines, and Estimated Cost are listed, changing circumstances, priorities, and funding streams may require this implementation table to change. The last column—Status—provides the opportunity to track changes in the implementation of an action and to provide a record of when a project or action is completed.

It is important to recognize that the tables serve as guides, and they are intended to be updated as circumstances warrant.

COST ESTIMATES

Costs will vary depending on the type of action described. Some recommendations may be more administrative, and can be addressed internally by the City Administration and Council. Other recommendations will require outside professional services.

The implementation tables provide a range of costs to give a general understanding of the scope of a project. The estimated costs are categorized in three levels: High, Medium, and Low. For the purposes of this plan, High, Medium, and Low cost ranges describe the costs to the City and can be understood as shown in the chart to the right.

Importantly, estimated costs are only supplied for the action as described, and they do not take into account potential additional steps. For instance, the action "Partner with NOACA to conduct TLCI plans for areas with proposed Major Streetscapes" only takes into account the cost of conducting a TLCI Plan itself. The estimate does not include the potential costs associated with constructing streetscape improvements proposed in any TLCI Plan.

Estimated Cost Range	
\$\$\$	High Cost (<i>Over \$500,000</i>)
\$\$	Medium Cost (<i>\$100,000 to \$500,000</i>)
\$	Low Cost (<i>Up to \$100,000</i>)

Priorities	
★★★	Highest Priority
★★	Medium Priority
★	Lowest Priority

PRIORITIES

The priorities for actions are identified by stars in the implementation tables. Those with three stars are the highest priority while fewer stars indicate lower priorities as shown in the table above. Priorities were determined through public input.

POTENTIAL PARTNERS

The Responsible Parties / Potential Partners listed below and in the following tables describe types of governmental, non-profit, private, and civic organizations that might assist in completing an action. In all cases, the changing scope of an action may warrant new partners not listed and current partners may no longer be appropriate.
